High Winds Cause Widespread Outages

Thunder Bay, ON – High winds and wet leaves on trees are creating conditions for multiple power power outages across the city. With winds expected to remain strong throughout the day, intermittent outages are expected to continue across the city.

Extra staff has been brought into the Thunder Bay Hydro Control Room and crews are responding to calls on a priority basis.

Customers who see a tree on a power line can call 343-1131. Your assistance in locating these problems will help us locate the source of outages particularly in rural areas. If power lines are down, please call 911 and stay away from the lines.

With the possibility of some lengthy power outages, customers should reminded that the Thunder Bay Hydro website has some information that would be of interest before experiencing an outage.
