## Directional Drilling and Open Trenching in your neighbourhood

Thunder Bay Hydro will be starting a project to upgrade the electricity system throughout your neighbourhood in June. Underground lines will be installed in the green space of the County Park area to provide redundancy of service. This system redesign is taking place to lessen the impact of power outages. The project will involve both directional drilling and open trenching.

### Trenching

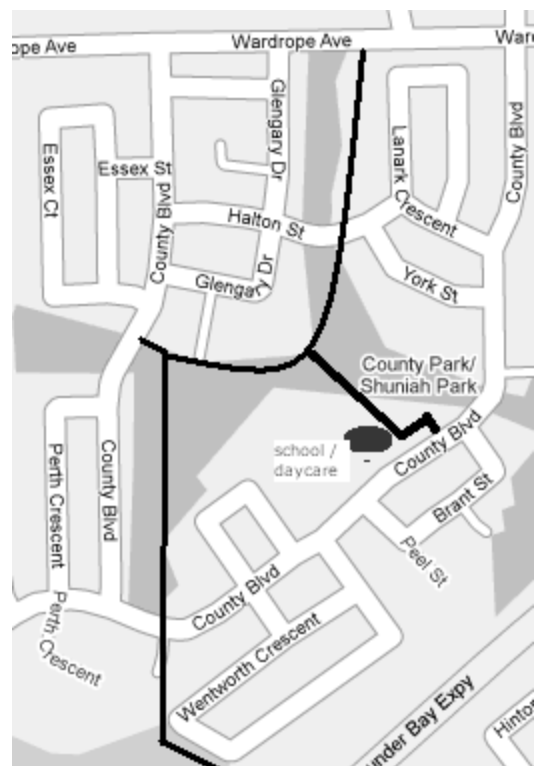

- will take place off the 400 block of County Blvd and move along the parking lot located at Our Lady of Charity School and into the green space.

### Directional Drilling

- will run from behind County Fair Plaza, between Prescott Crescent and County Blvd along the walking path that extends to Wardrope Ave.

**All standard safety measures will be in place.**

**Your awareness of the work should result in increased caution for yourself and your family when using the greenspace this summer.**

We expect this project to be completed by September 2009.

If you have any concerns or questions,  
please call **Don Zimak, Line Supervisor at 343-1007.**
